PROJECTS

Anti Spoofing System (Team Project)

[GitHub](#)

- Developed an AI-powered online exam proctoring system using Python, Streamlit, OpenCV, DeepFace, and YOLOv8 to detect suspicious activities.
- Implemented real-time face recognition and object detection to enhance examination integrity and reduce cheating attempts.

AgroGuide - Smart Agriculture Advisory Platform

[GitHub](#)

- Developed a web-based agriculture platform using PHP, MySQL, HTML, CSS, and JavaScript to provide crop and farming information.
- Integrated weather updates and agriculture-related data through dynamic database-driven modules with a responsive user interface.

Interactive Portfolio Website

[GitHub](#)

- Designed and developed a responsive portfolio website to showcase projects, skills, achievements, and coding profiles.
- Implemented modern UI components, smooth navigation, and performance-focused design for an enhanced user experience.

ACHIEVEMENTS & ACTIVITIES

- Secured **Second Place** in Project Expo conducted at Kongu Engineering College.
- Solved **340+ coding problems** across LeetCode, GeeksforGeeks, and HackerRank.
- Participated in IIT Madras Hackathon and a 24-Hour College Hackathon.
