

# NITHISH S

## INFORMATION TECHNOLOGY STUDENT

### CAREER OBJECTIVE

I am an Information Technology student who is learning programming and software development. I want to gain practical experience and improve my technical skills. My goal is to work on real projects, learn new technologies, and build a strong career in the IT field.

### ABOUT ME

I am a second-year B.Tech student in Information Technology. I am interested in software development and problem-solving. I enjoy working in a team and learning new things. I always try to improve myself step by step through practice and projects.

### PROJECTS

#### AGROGUIDE

AgroGuide is a team project developed to provide useful guidance related to agriculture. I worked on backend development and also helped in coordinating tasks among team members. This project helped me improve my teamwork, time management, and understanding of basic application development.

#### ANTI-SPOOFING SYSTEM FOR ONLINE EXAMS

This project was designed to improve security in online examinations. I handled the presentation part in front of guests and also contributed to frontend development. Through this project, I gained experience in teamwork, communication, and learning new technologies.

### INTERNS/INPLANT TRAINING

#### DATA SCIENCE WITH PYTHON

I completed inplant training in Data Science using Python. I learned the basics of data handling, simple data analysis, and how Python is used for working with datasets. This training helped me understand how data can be processed and analyzed for useful insights.

#### BLOCKCHAIN TECHNOLOGY

I underwent inplant training in Blockchain Technology, where I learned the basics of how blockchain works. I studied concepts such as decentralization, blocks, and secure data transactions. This training helped me understand how blockchain can be used in real-world applications like secure data storage and digital systems.

### SKILLS

- C, C++, Python, Java
- HTML, CSS, SQL
- Problem-solving
- Teamwork
- Communication
- Time Management
